

# USAVID Presentation Desk/Podium Series

## Information & Specifications

(model USAVID32 shown)

**The HSA USAVID Series** is a versatile presentation desk/podium designed to give you a convenient and configurable platform for teaching, lecturing and other presentation situations and a way to house and protect a wide variety of 19" rack mount and non-rackmount electronic equipment. Designed for the boardroom, auditorium, educational, corporate, and other professional environments, HSA USAVID's can provide essential podium functionality or can be optioned and customized to meet the requirements of today's audio, video, digital and control systems.

**Materials & Assembly:** The USAVID is handcrafted from a selection of engineered core and multi-core panels with premium Red Oak faces for high dimensional integrity, consistency and strength. Extra thick contour edging is used to match the oak or other optional/custom wood species or high pressure laminates.

**Base Configuration:** The unique design of the USAVID provides for 3 standard widths of 24, 32 and 44 inches. The basic model includes one adjustable full width shelf with additional shelves available. Standard on the USAVID's are special mar-resistant swivel casters (2 with locks) making the USAVID easily maneuverable.

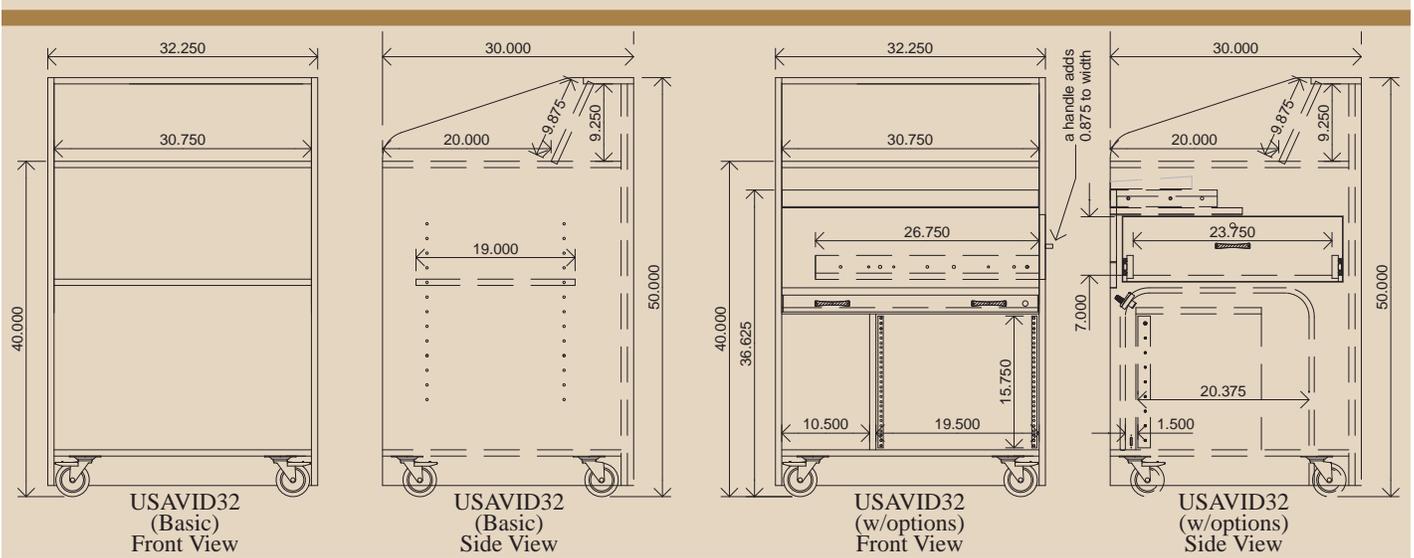

**Optional Configuration:** A wide range of standard options gives you the ability to "customize" the USAVID's at "non-custom" pricing. Options available include HSA's Signature Rolltop Tambour Door (with or without rack), 19" rack mounts, additional shelves, temperature sensing dual fan system and lockable document camera/projector drawer. All racks include heavy-duty steel rack rails with extra half-rack tapped screw holes to allow for a wide variety of equipment spacing with a 1.50 inch clearance between the rack rail and tambour in the tambour door covered option. The available option of a locking and removable audience facing door panel for the USAVID allows for easy access to the upper compartment (where you may have touch screens, switch panels or other control electronics) and lower shelves or optional pullouts, drawers or racks.

- ▶ The most beautiful & functional solution for housing electronic systems
- ▶ Contemporary design and functionally engineered
- ▶ A wide variety of options available to customize the USAVID Series to meet your needs
- ▶ Three standard body widths
- ▶ Solidly & carefully crafted
- ▶ With a variety of finishes

**Tambours:** We hand build our own tambour doors to assure quality and extra strength. The 1.5" by 1/2" thick tambours are lead by a 2" wide by 3/4" thick lead tambour for extra strength at the locks and polished brass handles. The thicker profile results in a very smooth operation that can be maintained with an occasional application of ordinary wax. A flush mounted cabinet lock on the lead tambour engages on the rack's lower inside, securing the rollfront tambour door without getting in the way.

**Finish:** A variety of stain colors are available with our popular and environmentally friendly waterborne finishing system. These advanced waterborne stains, sealers and finish coats produce a beautiful grain pattern and depth of color. They maintain the natural feel of the wood yet offer some of the best protection from abrasion and spills and keep looking great with minimal upkeep. Actual color samples are available to help you make your selection.

**Other USAVID Benefits:** The USAVID Series offers additional safety and security by organizing equipment and wiring which, in modern open installations, could be a source of many problems. Furthermore, the HSA USAVID Series (and our other fine wood furnishings) conveys an image of professionalism and quality, presenting yourself and your audio/video system in the very best way and as a matching, integral part of its environment.

**The USAVID's are available with the following options/customizations:**

- USKB Keyboard Pullout Below Worksurface
- USPSSR USAVID (pull-out-from side) Side Shelf on Right Side
- USPSSL USAVID (pull-out-from side) Side Shelf on Left Side
- USTAMB24 USAVID24 lower compartment RollFront locking tambour door.
- USTAMB32 USAVID32 lower compartment RollFront locking tambour door.
- USTAMB44 USAVID44 lower compartment RollFront locking tambour door.
- USRACK24 Lower rack bay for USAVID24. Can be covered with USTAMB24 option above.
- USRACK32 Lower rack bay for USAVID32. Can be covered with USTAMB32 option above.
- USRACK44 Lower rack bay for USAVID44. Can be covered with USTAMB44 option above.
- USSHELF24 Additional full-width shelf for USAVID 24
- USSHELF32 Additional full-width shelf for USAVID 32
- USSHELF44 Additional full-width shelf for USAVID 44
- USDCR Locking document camera/projector drawer. Right-handed
- USDCL Locking document camera/projector drawer. Left-handed

**Drawing Notes:** The maximum usable rack depth for equipment in the optional rack is minimally 20.375". Total vertical rack space varies due to other selected options. Refer to the drawing above or contact HSA for further information. There is a 1.50" maximum clearance between the backside of the tambour door and the front surface of the rack rail. These clearances are adequate for most applications but be sure to measure equipment to be installed to verify this. Additionally, a small amount of this clearance is taken by the lock assemblies. They are approximately 0.5" thick out to about 2.750" from the sidewalls and about 0.75" thick within about 0.875" of the sidewalls. Although you can be sure that standard 19" rack mount equipment will mount across our rack rails, wood is a natural product and overall working tolerances can be in the range of +/- 0.25" normally.

- USDOOR Keylocked, removable rear door (this is the audience facing side) in place of fixed panel on USAVID24, 32 or 44
- USFAN Dual, quiet fan system with temperature sensor installed where specified (as is possible)
- HDWESILV Satin/Silver finish hardware
- COVER Heavy-duty padded dust cover

Notes: Right or Left Side designations refer to operators/users orientation. USRACK size and available rack spaces dependent upon other options selected.

**WARRANTY:** HSA warrants standard products for a period of one year and covers defects in materials and workmanship. Wood is a natural material and every piece is unique. Deviations in the final products from each other or samples in finish, color, contrast, density and pattern are to be expected and is part of the beauty and appeal in wood products and are not considered defects under our warranty. The warranty does not cover improper installation or use of HSA products. The warranty also does not cover appearance or appearance items, finish items or any malfunctions caused by misuse or improper operation. HSA's liability does not include any consequential or resulting damage to person, property, equipment, goods, merchandise, profits, goodwill, or reputation arising out of any defect in or failure of product. HSA expressly disclaims warranty for a particular purpose and only designs and manufactures product according to dimensions furnished by the buyer or as stated in literature, website publication or drawings by HSA (which are subject to change without notice). HSA does not guarantee that another manufacturer's piece or pieces of equipment will fit into one of our designs or products as HSA does not exercise control over the sizes, arrangement, wiring or application of the other manufacturer's products or the end-user's operating preferences. Therefore the determination of whether or not equipment or a system will properly fit into an HSA product is a decision resting solely on the buyer prior to purchase. Warranty items will be repaired or replaced at our option without charge for materials or labor, provided such items are returned for inspection, transportation prepaid, to HSA, Inc., Mishawaka, IN.
